

IT Support Troubleshooting and User Help Guide

Resetting Your Password

1. Open the company login portal.
2. Click on 'Forgot Password'.
3. Enter your registered email address.
4. Verify the OTP or email verification link.
5. Create a strong password with uppercase, lowercase, numbers, and symbols.
6. Log in again using the new password.

Installing Approved Software

1. Open the internal software portal or company app store.
2. Search for the required software.
3. Click Install.
4. Accept administrator permission prompts if required.
5. Wait for installation to complete.
6. Restart the computer if requested.

Updating Existing Software

1. Open the installed application.
2. Navigate to Settings or Help.
3. Click 'Check for Updates'.
4. Download and install the latest update.
5. Restart the application after installation.

Connecting to Company VPN

1. Launch the VPN client application.
2. Enter company credentials.
3. Select the nearest VPN server.
4. Click Connect.
5. Verify successful connection before accessing internal systems.

Fixing Slow Computer Performance

1. Restart the system.
2. Close unused applications and browser tabs.
3. Check Task Manager for high CPU or memory usage.
4. Run antivirus and malware scans.
5. Free up disk space by deleting temporary files.

Printer Troubleshooting

1. Ensure the printer is powered on.
2. Check USB or network connections.
3. Verify the printer is selected as default.
4. Restart the printer spooler service.
5. Reinstall printer drivers if printing still fails.

Email Not Syncing

1. Check internet connectivity.
2. Restart the email application.
3. Verify mailbox storage limits.
4. Re-enter account credentials if authentication fails.
5. Contact IT support if issue persists.

Installing Security Updates

1. Open system settings.
2. Navigate to Windows Update or System Update.
3. Click 'Check for Updates'.
4. Install all critical and security updates.
5. Restart the computer after updates finish.
